

STEM EAGLES SCHOLARSHIP

Through the EAGLES Scholarship, you can earn your degree in one of Heritage’s non-medical STEM (science, technology, engineering or mathematics) majors– Biology, Environmental Science/Studies, Pre-Engineering, Computer Science and Mathematics– with no out of pocket cost for tuition. Twenty EAGLES Scholarships will be awarded annually. These scholarships are renewable annually while you work towards your bachelor’s degree.

You can turn your passion for protecting the environment into a rewarding career. The EAGLES Scholarship is a need- and merit-based award that, when combined with federal and state grants, covers the entire cost of attendance at Heritage.

In addition to the financial award, EAGLES scholars receive mentorship from faculty and members of the scientific community as well as opportunities to participate in special environmental pollution research, and paid internships. Plus, pre-engineering students can transfer seamlessly into the civil or environmental engineering programs at Portland State University, and retain their scholarship for the duration of their undergraduate studies at PSU.

ELIGIBILITY:

The EAGLES Scholarship is open to students who meet the following criteria:

- Have a 3.0 GPA (GPAs of 2.75-2.99 may be considered under certain circumstances.)
- Low-income and PELL Grant eligible
- Committed to majoring in one of the STEM studies areas
- Interested in research experiences within your major that support environmental sustainability
- Priority will be given to first-time freshmen and transfer students.
